Extruded Polystyrene Association Members

WOODBRIDGE, Va. - The Extruded Polystyrene Foam Association (XPSA) is a trade association representing manufacturers of Extruded Polystyrene Foam (XPS) insulation products and its raw material suppliers. XPSA members, including Dow Chemical, Owens Corning and Pactiv Corporation, collectively manufacture more than 95 percent of all XPS foam products sold in the North American market.

The Dow Chemical Company

For more than 50 years, Dow Building Materials has been the recognized leader in extruded polystyrene insulation. Since developing STYROFOAM® blue extruded polystyrene insulation in the 1950s, they continue to build on their foam expertise and technical strength to provide customers with the right thermal envelope product for any application. Today, Dow Building Materials offers an extensive line of science-based building envelope solutions, including:

- STYROFOAM® Extruded Polystyrene Insulation
- STYROFOAM WEATHERMATE® Plus Building Wrap

Dow's highly skilled professionals are on hand to provide technical assistance from the planning stage through completion. For product availability or the name of a local sales representative, call 1-800-232-2436. For additional information, an architectural binder and technical data sheets, case studies or literature on any of the insulation systems, call 1-866-583-BLUE (2583) or visit http://www.dowbuildingmaterials.com.

Owens Corning

Owens Corning's family of pink extruded polystyrene rigid foam insulation products offers exceptionally long-lasting R-value, superb water and moisture resistance and a range of compressive strengths to meet numerous building needs. They can be used in commercial and residential applications including under slab, re-siding, masonry cavity walls, interior basement walls, insulating sheathing, crawl spaces and exterior foundation walls. Products include:

- FOAMULAR® Rigid Foam Insulation
- PROPINK® Super Tough Insulating Sheathing
- INSULPINK® Rigid Foam Basement Wall Insulation
- FanFold Re-siding Underlayment

Owens Corning is a world leader in building materials systems and composites systems. Additional information is available on Owens Corning's eb site at www.owenscorning.com or by calling the company's toll-free General Information line: 1-800-GET PINK.

Pactiv Corporation

Pactiv Building Product's XPS insulation board and underlayments are used for construction solutions throughout the United States and selected international markets. The GreenGuard® brand and light green trademark color are signatures that top quality products were used to achieve energy efficiency and moisture management. Products marketed under the GreenGuard® brand that serve and enhance the work of the building professional include:

- Extruded Polystyrene Insulation Board
• Extruded Polystyrene Fanfold Underlayment for Re-Siding, Waterproofing Protection Board, Roofing Recovery Board, Manufactured Housing and Agricultural applications
• Four grades of housewrap/drainage plane products
• Sill Sealer
• Contractor Tape

Contact Pactiv Building Products at 1-800-241-4402 or http://pactiv.com/green-guard/ to locate the nearest distributor, to have a sales representative contact you or to receive product information.

About Extruded Polystyrene Foam Association
The Extruded Polystyrene Foam Association (XPSA) serves as the industry’s leader on product stewardship by conducting research to substantiate performance claims and serves as spokesperson to promote the benefits of extruded polystyrene foam (XPS) insulation applications. Its excellent resistance to moisture, high compressive strength and ability to maintain long-term insulating power make XPS foam the premiere insulating material for commercial, industrial and residential structures, as well as for critical civil engineering uses. For more information, please look for XPSA’s website to be launched in February 2004 at www.xpsa.com, or call 800-978-9772.
